

# Project Data Thieves

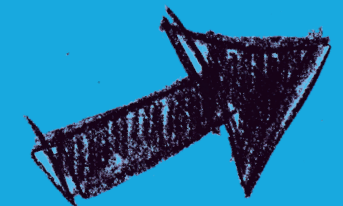

Iron Babies!

# Problem:

Being a parent is hard! Between switching diapers and waking up at 5.am somebody needs to go shopping for baby products, and preferably we want the best prices.

# Iron babies!

**The baby products search tool**

We search the market for the best baby products prices!

# Difficulties

- Compare websites with different languages and currencies (Amazon, Dollars.)
- We were unable to do Web Scraping on dynamic pages.
- Pages have different designs for baby section

# Future implementations

- Include the location factor to compare the stores of a given city.
- Include more products in the comparison list.
- Use the Scraping web by Selenium in dynamic pages.
- More columns
